IndusGuard WAF for AWS

Instant virtual patching backed with a Zero False Positive Promise

PRODUCT OVERVIEW

- Zero WAF False Positive guarantees that WAF rules for known vulnerabilities will never block legitimate traffic

- Enhanced protection against known vulnerabilities like OWASP Top 10, business logic flaws and others

- Enhanced DDoS mitigation using custom rules for application DDoS attacks

- Continuous customized tuning, configuration, response and management by security experts

- Designed to work with IndusGuard Web scanner

- Amazon Auto Scaling to increase the number of instances based on traffic variation

IndusGuard WAF for AWS is industry's first SaaS based managed web application firewall and DDoS protection solution. It provides virtual patching for applications by instantly blocking wide range of vulnerabilities without any code modification. Protecting your application with our WAF requires minimal intervention from application owners.

Our managed security experts will protect and monitor your application by leveraging their application security legacy. IndusGuard WAF provides a combination of expert tuning with application monitoring to guarantee zero WAF false positive (i.e. prevent attacks without obstructing any legitimate traffic), continuous application protection, and managed application DDoS mitigation.

Indusface's high-availability architecture also ensures business continuity under extreme disaster situations by reverting to a fail-open mode, while Amazon auto scaling support adjusts usage up and down as and when required. We also optimize resource utilization so you pay only for what you use.

INDUSFACE™

amazon web services

Unique Features
- Zero WAF False Positives
- Managed Application and DDoS
- Custom Rules
- AWS Auto Scaling

Software-as-a-Service (SaaS)
- Pay as you go model

Compliance Support
- PCI DSS 6.6

> " Industry's first fully integrated application scanner and firewall to provide immediate protection "

FEATURES

Zero WAF False Positives

- Guarantees that WAF rules for known vulnerabilities will never block legitimate traffic when tuned with a web application scanner (WAS)
- Provides instant protection from all known application vulnerabilities on day zero of deployment

Software-as-a-Service (SaaS)

- Pay-as-you-go subscription model without any upfront capital expense
- No hidden or additional costs

Enhanced Application Protection

- Continuous breach prevention against OWASP Top 10, WASC TV v 2.0 and bot attack
- IP reputation and geolocation based protection
- Custom rules for business logic vulnerabilities, unauthorized user behavior, and sensitive information leakage

AWS Auto Scaling Support

- Process almost unlimited amount of traffic as and when required

PCI 6.6 Compliance

- Ensure compliance with PCI DSS requirement 6.6
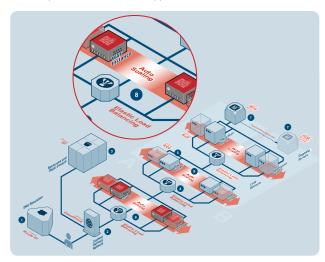

Informative Dashboard

- Quick glance at security posture and attack trends across all the websites
- Detailed information on type of threats, severity, geographical location, source IP address, affected websites, action taken on threats and more
- Actionable reporting for complete control

SSL Support

- Use WAF Premium with an existing SSL Certificate, or
- Get a custom SSL certificate in front of your existing SSL

IndusGuard Web Support

- Fully supported by IndusGuard Web
- Compatible with other web application scanners

Enhanced DDoS Mitigation

- Block bots specifically designed for application DDoS attacks
- Prevent clickjacking script injections
- Mitigate HTTP connection abuse

Web Application Protocol Support

- Supports a wide range of application protocols – HTTP (0.9/1.0/1.1), HTTPS, HTML restrictions
- Also supports various data interchange protocols - XML, SOAP, AJAX, JSON, REST

Managed by Certified Security Experts

- Real time incident monitoring, response and reporting
- Continuous WAF rules modulation to ensure zero false positive
- Analyze and block application DDoS attacks

Total Application Security that Detects, Protects and Monitors

We are industry's first truly integrated 'Total Application Security' provider that 'Detects, Protects & Monitors' our customers' applications on a continuous basis backed with Zero False positive promise. Our suite of products includes: IndusGuard Web- Dynamic Application Security Testing (DAST) solution for Web Applications, IndusGuard WAF- Fully managed Web Application Firewall and DDoS protection solution, and IndusGuard Mobile- Dynamic Application Security Testing solution for Mobile Applications.
